Foreword

Dear reader, On behalf of the four Scientific Statistical Societies – the SEIO, Sociedad de Estadística e Investigación Operativa (Spanish Statistical Society and Operation Research); SFdS, Société Française de Statistique (French Statistical Society); SIS, Società Italiana di Statistica (Italian Statistical Society); and the SPE, Sociedade Portuguesa de Estatística (Portuguese Statistical Society) – we would like to inform you that this is a new book series of Springer entitled “Studies in Theoretical and Applied Statistics,” with two lines of books published in the series: “Advanced Studies” and “Selected Papers of the Statistical Societies.”

The first line of books offers constant up-to-date information on the most recent developments and methods in the fields of theoretical statistics, applied statistics, and demography. Books in this series are solicited in constant cooperation between the statistical societies and need to show a high-level authorship formed by a team preferably from different groups so as to integrate different research perspectives.

The second line of books presents a fully peer-reviewed selection of papers on specific relevant topics organized by the editors, also on the occasion of conferences, to show their research directions and developments in important topics, quickly and informally, but with a high level of quality. The explicit aim is to summarize and communicate current knowledge in an accessible way. This line of books will not include conference proceedings and will strive to become a premier communication medium in the scientific statistical community by receiving an Impact Factor, as have other book series such as “Lecture Notes in Mathematics.”

The volumes of selected papers from the statistical societies will cover a broad range of theoretical, methodological as well as application-oriented articles, surveys and discussions. A major goal is to show the intensive interplay between various, seemingly unrelated domains and to foster the cooperation between scientists in different fields by offering well-founded and innovative solutions to urgent practice-related problems.

On behalf of the founding statistical societies I wish to thank Springer, Heidelberg and in particular Dr. Martina Bihn for the help and constant cooperation in the organization of this new and innovative book series.

Rome, Italy

Maurizio Vichi

Preface

This volume of the selected papers from Portugal is a product of the Seventeenth Congress of the Portuguese Statistical Society. The meeting took place at the beautiful resort seaside city of Sesimbra in 2009. At the meeting there were 5 invited 1-hour conferences, 118 papers presented in 20-min talks, and 68 in poster sessions. Following all these presentations, 72 papers were submitted by March 2010. More than 200 participants had fruitful opportunities for learning about the latest ideas and methods being developed in a broad variety of statistical domains such as linear models and regression, survival analysis, extreme value theory, and statistics of diffusions and other Markov processes. Many of the papers and posters presented were applied studies in areas where statistics has a powerful and recognized role as an intelligence-gathering and management tool. The works presented at the congress that were submitted for publication in this volume were thoroughly refereed by a rigorous team of scientific experts, which the editorial team would like to express its heartfelt thanks to. The papers selected were carefully edited in order to provide readers with an extensive, reliable reference work on the subjects treated, as well as a thorough account of the best contributions presented at this major scientific event.

Contents

Part I Invited Sessions

Youden Square with Split Units	3
Stanisław Franciszek Mejza and Shinji Kuriki	
Likelihood and PLS Estimators for Structural Equation Modeling: An Assessment of Sample Size, Skewness and Model Misspecification Effects	11
Manuel J. Vilares and Pedro S. Coelho	

Part II Communications

A Parametric Cure Model with Covariates	37
Ana M. Abreu and Cristina S. Rocha	
Survival Analysis Applied to the Study of Time from Diagnosis of HIV-1 Infection to AIDS in Portugal	47
Marta Alves, Cristina S. Rocha, and Maria Teresa Paixão	
A New Independence Test for VaR Violations	55
P. Araújo Santos and M.I. Fraga Alves	
Discrimination Between Parametric Survival Models for Removal Times of Bird Carcasses in Scavenger Removal Trials at Wind Turbines Sites	65
Regina Bispo, Joana Bernardino, Tiago A. Marques, and Dinis Pestana	
Uniformity	73
M.F. Brilhante, M. Malva, S. Mendonça, D. Pestana, F. Sequeira, and S. Velosa	
Asymptotic Comparison at Optimal Levels of Minimum-Variance Reduced-Bias Tail-Index Estimators	83
Frederico Caeiro and M. Ivette Gomes	

Extremal Behavior of the Generalized Integer-Valued Random Coefficient Autoregressive Process	93
Luísa Canto e Castro, Dulce Gomes, and Maria da Graça Temido	
Models of Individual Growth in a Random Environment: Study and Application of First Passage Times	103
Clara Carlos, Carlos A. Braumann, and Patrícia A. Filipe	
Generalized Linear Mixed Effects Model in the Analysis of Longitudinal Discrete Data	113
Eunice Carrasquinha, M. Helena Gonçalves, and M. Salomé Cabral	
Risk Assessment on <i>Campylobacter</i> in Broiler Meat at Slaughter Level in Portugal	121
Marta Castel-Branco, Marília Antunes, Patrícia Inácio, and Miguel Cardo	
Predicting and Treating Missing Data with Boot.EXPOS	131
Clara Cordeiro and M. Manuela Neves	
Bayesian Genetic Mapping of Binary Trait Loci	139
César Correia, Nuno Sepúlveda, and Carlos Daniel Paulino	
Concomitant Latent Class Models Applied to Mathematics Education ...	147
Maria Eugénia Ferrão and José G. Dias	
Evaluating Discriminant Analysis Results	155
Ana Sousa Ferreira and Margarida Cardoso	
Distribution of the Number of Losses in Busy-Periods of $M^X/G/1/n$ Systems	163
Fátima Ferreira, António Pacheco, and Helena Ribeiro	
Misleading Signals in Simultaneous Residual Schemes for the Process Mean and Variance of AR(1) Processes: A Stochastic Ordering Approach	173
Patrícia Ferreira Ramos, Manuel Cabral Morais, and António Pacheco	
Conditional EVT for VAR Estimation: Comparison with a New Independence Test	183
M.I. Fraga Alves and P. Araújo Santos	
Asymptotic Distribution of the Maximum for a Chaotic Economic Model	193
Ana Cristina Moreira Freitas	
Adaptive Choice of Thresholds and the Bootstrap Methodology: An Empirical Study	203
M. Ivette Gomes, Fernanda Figueiredo, and M. Manuela Neves	

Distributional Properties of Generalized Threshold ARCH Models	213
E. Gonçalves and N. Mendes-Lopes	
Preliminary Results on Confidence Intervals for Open <i>Bonus Malus</i>	223
Gracinda R. Guerreiro, João T. Mexia, and Maria F. Miguens	
Study of the Electrocardiographic Fluctuations on Brugada Syndrome Screening	231
Carla Henriques, Ana Cristina Matos, and Luís Ferreira dos Santos	
Mortality on Older Portuguese Population due to Circulatory System Diseases and Neoplasms: A Spatio-Temporal Analysis by Age and Sex	239
Sandra Lagarto, Carla Nunes, Dulce Gomes, and Maria Filomena Mendes	
Absolute Diffusion Process: Sensitivity Measures	249
Manuela Larguinho, José Carlos Dias, and Carlos A. Braumann	
Scaling Exponents in Heart Rate Variability	259
Argentina Leite, Maria Eduarda Silva, and Ana Paula Rocha	
Prediction of Dementia Patients: A Comparative Approach Using Parametric Versus Nonparametric Classifiers	269
João Maroco, Dina Silva, Manuela Guerreiro, Alexandre de Mendonça, and Isabel Santana	
Pareto Scale Mixtures	281
Miguel Martins Felgueiras	
Fitting Johnson's S_B Distribution to Forest Tree Diameter	289
Ayana Mateus and Margarida Tomé	
On a Continuous-Time Stock Price Model with Two Mean Reverting Regimes	297
Pedro P. Mota	
Generalized F Tests in Models with Random Perturbations: The Truncated Normal Case	307
Célia Nunes, Dário Ferreira, Sandra Ferreira, and João T. Mexia	
Generalized Linear Models, Generalized Additive Models and Neural Networks: Comparative Study in Medical Applications	317
Ana Luisa Papoila, Cristina Rocha, Carlos Geraldés, and Patricia Xufre	
Joint-Regression Analysis and Incorporation of Environmental Variables in Stochastic Frontier Production Function: An Application to Experimental Data of Winter Rye	325
Dulce Gamito Pereira and Ana Sampaio	

On the Maximum and Minimum of a Stationary Random Field	337
Luísa Pereira	
Publication Bias and Meta-analytic Syntheses	347
D. Pestana, M.L. Rocha, R. Vasconcelos, and S. Velosa	
Self-perception of Health Status and Socio-Economic Differences in the Use of Health Services	355
Alexandra Pinto, Victor Lobo, Fernando Bação, and Helena Bacelar-Nicolau	
Comparison of Modal Variables Using Multivariate Analysis	363
Isabel Pinto Doria, Áurea Sousa, Helena Bacelar-Nicolau, and Georges Le Calvé	
Disentangling the Relationship Between Entrepreneurship and Job Creation by Poisson Mixture Regressions	371
Leandro P. Pontes and José G. Dias	
Simulation Study of the Calibration Technique in the Extremal Index Estimation	381
D. Prata Gomes, João T. Mexia, and M. Manuela Neves	
Semi-parametric Building of the Optimal Screening Region in Supervised Classification	391
Sandra Ramos, Maria Antónia Amaral Turkman, and Marília Antunes	
An Application of Statistical Methods of Indirect Estimation and Projection of Internal Migration Flows Within the Portuguese Mainland	401
Maria Filomena Mendes, Antonio Caleiro, Sandra Lagarto, and Filipe Ribeiro	
Robust Clustering Method for the Detection of Outliers: Using AIC to Select the Number of Clusters	409
Carla M. Santos-Pereira and Ana M. Pires	
HLA Allele and Haplotype Frequencies of the Portuguese Bone Marrow Donors Registry	417
Ricardo São João, Ana Luisa Papoila, Dário Ligeiro, and Hélder Trindade	
Independent Component Analysis for Extended Time Series in Climate Data	427
Fernando Sebastião and Irene Oliveira	
Life Satisfaction: A MIMIC Approach with a Discrete Latent Variable	437
Patrícia Serra, José G. Dias, and Maria de Fátima Salgueiro	

An Application of MRMC ROC Curves on Radiology	445
Carina Silva-Fortes, Maria Antónia Amaral Turkman, Luis Lança, Ricardo Silva, and Gonçalo Marques	
Some Remarks About Gibbs Variable Selection Performance	453
Júlia Teles and Maria Antónia Amaral Turkman	
Dependence of Multivariate Extremes	463
