# CATÁLOGO DOS MATERIAIS ARQUEOLÓGICOS

## - Monumentos Megalíticos -

### NOTA EXPLICATIVA

1.

Procura-se com o presente catálogo, mais do que descrever pormenorizadamente cada peça, registar a sua localização tridimensional no espaço que ocupava na altura da sua recolha.

Face ao grande volume de peças disponíveis e à descrição gráfica de todas elas, geralmente apresentadas com duas projecções e um ou mais cortes, optámos por inserir neste catálogo unicamente o número de registo geral, antecedido pela sigla identificadora do monumento, o tipo de artefacto, o material em que foi obtido, o quadrado de recolha e as referências tridimensionais de cada objecto.

Na ausência de todos, ou apenas de alguns elementos de localização e sempre que possível, adossaram-se à descrição mais algumas informações que possibilitam um melhor enquadramento da peça no espaço. Estas informações revestem-se de particular importância para os objectos provenientes, ou de terras em revolvimento, ou de violações antigas.

Mais de cinquenta por cento das peças catalogadas são provenientes de escavações efectuadas pelo extinto Grupo de Arqueologia de Castelo de Vide. Como noutro capítulo já referimos, destas escavações, para além dos materiais que aqui descrevemos, poucas informações existem. A observação dos monumentos espoliados e mais alguma informação oral obtida, juntamente com os esboços existentes da violação da anta da Tapada de Matos, foi possível, para alguns casos, identificar genericamente os espaços de recolha. Estas escavações, efectuadas nos primeiros anos da década de oitenta, atingiram unicamente o espaço interno dos monumentos. Pelas informações que possuímos nenhuma mamoa foi objecto de escavação.

Foi nossa preocupação ao divulgarmos pormenorizadamente a localização dos materiais catalogados facilitar futuras revisões à luz de novos conhecimentos. Raras são as colecções guardadas em museus ou depósitos que se encontrem acompanhadas de todas as referências de recolha. Os presentes materiais, ou se encontram já expostos, ou aguardam exposição para breve. Os registos que os acompanham são os próprios de cada museu e nem sempre contemplam todas as informações das fichas de campo, perdendo-se assim, e geralmente para sempre, o contexto da peça. Pretendeu-se, com o presente

catálogo, ultrapassar as monótonas descrições, geralmente inconsequentes, e fornecer, tanto quanto possível, informações que possibilitem o enquadramento da peça no seu contexto.

Neste catálogo incluem-se unicamente as peças inéditas e as que por nós foram parcialmente divulgadas em relatórios de escavação já publicados. Os outros materiais conhecidos na região em estudo foram já anteriormente publicados em obras de síntese e de grande divulgação, tornando-se desnecessária a sua recatologação.

Os materiais provenientes do Termo Municipal de Valência de Alcântara foram publicados por Primitiva Ramírez (Ramírez, 1988).

Os reduzidos espólios dos monumentos da freguesia de Montalvão recolhidos na década de cinquenta encontram-se descritos por Georg e Vera Leisner (Leisner e Leisner, 1959).

Todos os materiais do concelho de Marvão foram incluídos neste inventário com a excepção das quinze peças recolhidas durante a violação da anta da Tapada do Castelo e por nós já divulgados em 1981 (Dias e Oliveira, 1981). No Museu Nacional de Arqueologia guardam-se várias placas de xisto registadas como provenientes da Anta dos Vidais em Marvão e já publicadas por Georg e Vera Leisner (Leisner e Leisner, 1959). No mesmo estudo inscreve-se um vaso com mamilos, exposto no Museu de Elvas e catalogado como proveniente da anta do Porto da Espada. Como já anteriormente afirmámos, estas peças deverão estar incorrectamente inventariadas, atendendo a que não há qualquer notícia de antas na região do Porto da Espada e não se conhece também nenhuma anta com o nome de Vidais. Pelas informações que temos e pela correspondência existente entre António Maçãs e Leite de Vasconcelos ficamos a saber que esses materiais terão sido provavelmente recolhidos por Pedro Pena nas lapas de abrigo de Vidais e não numa anta denominada Vidais, desconhecendo-se assim o contexto da recolha.

O reduzido número de materiais do concelho de Castelo de Vide provenientes de escavações e violações anteriores aos anos oitenta do presente século e cuja origem exacta se desconhece já foram anteriormente descritos por Conceição Rodrigues (Rodrigues, 1975). Deste concelho e porque embora já publicados mas em texto policopiado e de difícil acesso (GACV, 1987), voltamos a descrever as placas e o báculo provenientes das antas do Alcogulo I e II, do Tapadão da Relva, Vale da Estrada, Olheiros e Tapada de Matos, apresentados pelos membros do Grupo de Arqueologia de Castelo de Vide ao 1º Encontro de História Regional e Local do Distrito de Portalegre.

Os materiais provenientes de monumentos do concelho de Marvão que neste catálogo se descrevem encontram-se depositados e praticamente todos expostos no Museu Municipal de Marvão.

As peças recolhidas em monumentos do concelho de Castelo de Vide incluídas neste catálogo encontram-se guardadas no depósito de materiais arqueológicos da Secção de Arqueologia da Câmara Municipal de Castelo de Vide.

Na Câmara Municipal de Nisa entregámos os materiais recolhidos nas antas Lomba da Barca e Fonte da Pipa. Os materiais recolhidos na anta da Nave do Padre Santo

foram entregues para exposição no núcleo museológico da Santa Casa da Misericórdia de Nisa, por indicação da respectiva Câmara Municipal.

2.

Neste catálogo incluem-se os desenhos, com duas projecções e um a dois cortes, das peças arqueológicas inéditas provenientes dos monumentos da área em estudo. Apenas não são inéditos os materiais já divulgados pelo GACV (GACV, 1987) e os por nós publicados em relatórios de escavação (Oliveira, 1990; 1992).

Embora tentássemos uniformizar critérios de desenho, verificam-se neste *corpus* algumas, mas pouco significativas, diferenças na técnica de tintagem e projecção das peças. Estas variantes resultam, devido aos diferentes desenhadores que conosco colaboraram e ao grande número de materiais reproduzidos. Embora a maior parte dos desenhos tivessem sido por nós elaborados, socorremo-nos também, e sobretudo para os materiais provenientes de escavações antigas do concelho de Castelo de Vide, dos já anteriormente efectuados pelos desenhadores da Câmara Municipal de Castelo de Vide, que nos facultou a sua utilização.

A não existência de critérios universalmente aceites para a projecção e tintagem das peças arqueológicas, a técnica e a "arte" de cada desenhador transparece no trabalho final. Esta diversidade reflecte-se, naturalmente, num trabalho como o presente onde mil quinhentas e oitenta e sete peças foram ilustradas por cinco desenhadores. Durante o desenho de tão grande número de objectos, ao longo de vários anos (desenhos efectuados entre 1984 e 1993), aprofundou-se a técnica e procuraram-se outras soluções na apresentação final, reflectindo-se, naturalmente, num trabalho de síntese como o presente. Esta diversidade é mais notória nos materiais líticos, onde nem sempre os critérios de projecção foram idênticos. Nas cerâmicas existe maior uniformidade. Efectuou-se a recuperação da forma completa do recipiente sempre que o mesmo se encontrava inteiro ou quando, pelo menos, mais de metade da peça se encontrava unida ou possibilitava colagem desde que da base ao lábio existisse continuidade. Quando o fragmento possibilitava a recuperação da forma, mas era inferior a metade da peça, essa porção foi projectada directamente, sem orientação, sobre o corte devidamente orientado, evidenciando-se assim as reais dimensões do fragmento. Quando o fragmento era demasiado pequeno inviabilizando a recuperação do diâmetro do bordo ou do bojo, mas possibilitava a sua orientação, ao lado do corte procedeu-se à sua projecção directa, indicando-se, assim, também as dimensões reais do fragmento. Quando alguma peça, cerâmica ou não, apresentava alguma particularidade de maior interesse procedemos a mais projecções, rolagens ou cortes especiais.

No presente *corpus* encontram-se desenhos por nós efectuados, pelo dr. Manuel Calado, quando nosso aluno na Universidade de Évora, e pelos desenhadores da Secção de Arqueologia da Câmara Municipal de Castelo de Vide, senhores António Pita, Bica Penhasco e João Magusto.

3.

O presente catálogo organiza-se por concelhos. Em cada concelho as sepulturas megalíticas apresentam-se por ordem alfabética. O único menir que forneceu material desenhável foi o do Carvalho situado no concelho de Castelo de Vide. Estes materiais encontram-se registados depois dos recolhidos nas sepulturas megalíticas deste concelho.

Na identificação das peças utilizámos as seguintes abreviaturas, sendo esta também a ordem de apresentação dos materiais incluídos neste catálogo.

#### **Concelho de Marvão**

**BC** - Anta da Bola da Cera

**C** - Anta da Cabeçuda

**AC** - Anta das Castelhanas

**FB** - Anta da Figueira Branca

**AP** - Anta dos Pombais

#### **Concelho de Castelo de Vide**

**AI** - Anta I do Alcogulo

**AII** - Anta II do Alcogulo

**CE** - Anta I do Cerejeiro

**CI** - Anta I dos Coureleiros

**CII** - Anta II dos Coureleiros

**CIII** - Anta III dos Coureleiros

**CIV** - Anta IV dos Coureleiros

**G** - Anta do Galhardo

**O** - Anta dos Olheiros

**PA** - Anta do Pai Anes

**PV** - Anta do Porto Aivado

**S** - Anta do Sobral

**TM** - Anta da Tapada de Matos

**TR** - Anta do Tapadão da Relva

**AVE** - Anta do Vale da Estrada

**MC** - Menir do Carvalho

#### **Concelho de Nisa**

**FP** - Anta da Fonte da Pipa

**LB** - Anta da Lomba da Barca

**PS** - Anta da Nave do Padre Santo
