

LANDSCAPE ELEMENTS - PALETTES

PLANTING PALETTE

The planting palette will take cues from the native vegetation of the Caledonian forest, whose boreal species consisted primarily of *Pinus sylvestris*, *Betula* spp, *Sorbus aucuparia*, *Populus tremula*, *Quercus* spp. and *Juniperus communis*.

HARD LANDSCAPE PALETTE

The hard landscape palette is based on high quality natural and sustainable materials, with a mix of traditional granite setts and decked boardwalk in the most prominent areas of the development, and permeable pavers, resin-bound and traditional gravel pavement in the surrounding spaces.
