

Transition Pathways towards Sustainability in Agriculture

Case Studies from Europe

Edited by I Darnhofer, Dept. of Economic and Social Sciences, Univ. of Natural Resources and Life Sciences, Vienna, Feistmantelstr 4, Vienna, 1180, AUSTRIA, L Sutherland, James Hutton Institute, G Wilson, University of Plymouth, UK, L Zagata

Main Description This book focuses on understanding farming transition pathways towards sustainability, using case studies from Europe. It assesses the utility of the multi-level perspective in transition theory for addressing contemporary issues and identifies future research needs, making it an essential read for researchers of rural or agricultural change.

Readership For universities and colleges of further and higher education

[Table of Contents](#)

Contributors; Glossary; Acknowledgements

1 Introduction

2 Socio-technical transitions in farming: key concepts

3 Understanding the diversity of rural areas

4 Utilising the multi-level perspective in empirical field research: methodological considerations

5 Lifestyle farming: countryside consumption and transition towards new farming models

6 More than just a factor in transition processes? The role of collaboration in agriculture

7 High nature value farming: environmental practices for rural sustainability

8 Transition processes and natural resource management

9 On-farm renewable energy: a 'classic case' of technological transition

10 'The missing actor': alternative agri-food networks and the resistance of key regime actors

11 Local quality and certification schemes as new forms of governance in sustainability transitions

12 Transdisciplinarity in deriving sustainability pathways for agriculture

13 Conceptual insights derived from case studies on 'emerging transitions' in farming

14 Conclusions
