

WELCOME /BEM-VINDO

*Promoting bonds – a new challenge
for the future of health professions in
Europe*

For some time that our universities
and our teachers have been keeping a
close relationship through the
exchange of students and teachers.

This relationship of friendship and
sharing of knowledge has been very
important for the affirmation of our
university as a multicultural learning
space thus validating our training as a
high national and international level
training.

It is time for us to join a scientific and
social event our partners building
bridges, strengthening friendships and
thinking projects for the future.

In a sentence: Promoting bonds - a
new challenge for the future of health
professions in Europe

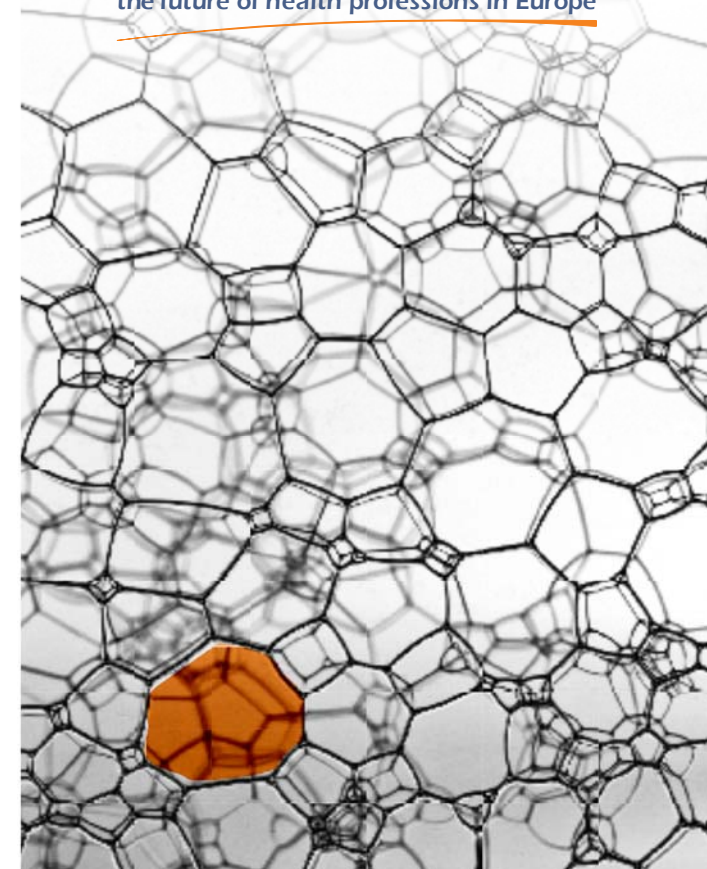

portalegre, portugal
