

May-June 2009

International Journal of Green Energy

Special Issue on
Sustainable Energy Sources
and Developing
Clean Energy Technologies

Volume 6

Number 3

2009

CEE[®]

Official Journal of The Association of Energy Engineers

INTERNATIONAL JOURNAL OF GREEN ENERGY

An International Journal

Special Issue on Sustainable Energy Sources and Developing
Clean Energy Technologies

Guest Editors: Antonio Hector Reis and Antonio F. Miguel

Vol. 6 No. 3
2009

CONTENTS

- 229** Editorial
- 230** Teaching Thermodynamics via Analysis of the West Point Power Plant **Seth Norberg, Gunnar Tamm, Justin Highley, Michael Rounds, Daisie Boettner, and Özer Arnas**
- 245** Dye-sensitized Solar Cells: Novel Concepts, Materials, and State-of-the-Art Performances **H. Aguilar Ribeiro, P. M. Sommeling, J. M. Kroon, A. Mendes, and C. A. V. Costa**
- 257** Characterization of Sustainable Development Indicators for Various Power Generation Technologies **Stéphane Genoud and Jean-Baptiste Lesourd**
- 268** Methodology Description Behind Implementing an Energetic and Exergetic Cradle-to-Gate Analysis for Valorizing the Optimal Utilization of Biomass **B. Brehmer and J. Sanders**
- 287** Energy and Environmental Benefits of Rapeseed Oil Replacing Diesel **João Malça and Fausto Freire**
- 302** Use of Phase-Change Materials as Passive Elements for Climatization Purposes in Summer: The Portuguese Case **N. T. A. Fernandes and V. A. F. Costa**
- 312** Carbon Credits and Energy Efficiency **M. A. Saidel, T. M. Reis, and F. A. A. Prado Jr.**
